

Shower Hose-Installation Guide

Connection: G1/2" universal

Max Pressure: 2.0 Mpa/20 bar

Max Temp: 90°/194°F

1. Ensure washers are correctly positioned at both hose ends before installation.

2. Correctly connect both ends of the hose to the shower head and the wall outlet.
3. Leak Test: Turn on water after installation. If leakage is observed, recheck washer placement.

CAUTION:

If the fitting resists threading, do not force it. Check that the threads are G1/2" and remove any old tape or debris before retrying. Forcing may damage the threads.
